CAREER OBJECTIVE

Final-year B.Tech Cybersecurity student (graduating July 2026, CGPA 8.8/10) with an ISO/IEC 27001:2022 Lead Auditor certification and hands-on experience in security assessments and compliance-aligned documentation. Seeking a GRC internship to apply my knowledge of information security frameworks, risk identification, and compliance practices in a professional audit and governance environment.

CERTIFICATIONS

• ISO/IEC 27001:2022 Lead Auditor	Most relevant for GRC roles
• CompTIA Security+	Verified
• Zero Trust Certified Associate (ZTCA)	Zscaler
• Zscaler Cybersecurity Fundamentals Associate	

TECHNICAL SKILLS

Frameworks & Standards	ISO/IEC 27001:2022, NIST CSF, CIS Benchmarks v2.0, OWASP Top 10
Security Tools	ELK Stack, Splunk, Burp Suite, Nessus, Wireshark, Nmap, Scapy
Cloud & Infrastructure	AWS (IAM, S3, EC2, CloudTrail, Security Hub), Microsoft Azure
Programming	Python, Bash, Django, REST API Security, Automation Scripting
Concepts	Vulnerability Management, Risk Identification, Incident Response, IAM, Network Security, SDLC

WORK EXPERIENCE

Security Testing Intern <i>RetroSafe Innovations LLP, Bengaluru, India</i>	Nov 2024 – Nov 2025
--	---------------------

- Executed 50+ security test cases across 8+ application modules; documented 12 critical vulnerabilities with clear reproduction steps, risk severity ratings, and remediation recommendations building skills directly applicable to GRC audit reporting.
- Reviewed 200+ API endpoints for security control gaps and data inconsistencies; maintained structured vulnerability trackers and evidence logs, reducing developer resolution time by 40%.
- Identified 5 input validation flaws across 15+ entry points; mapped findings to OWASP Top 10 guidelines, demonstrating ability to align security observations with established compliance frameworks.
- Authored structured test documentation for 6 feature releases in line with SDLC and CI/CD security standards gaining experience in maintaining compliance-aligned technical documentation.

PROJECTS

WebSafe Security Scanner, AI-Powered Threat Detection <i>Python · Django · Scikit-learn · Scapy</i>	2025
---	------

- Developed a web vulnerability scanning platform using ML models (Random Forest, Logistic Regression, Naive Bayes), achieving 99.85% accuracy in network threat classification.

- Implemented security controls including CSRF protection, input sanitization, and role-based access control (RBAC) demonstrating practical application of security design principles.

Digital Forensic Toolkit, 1st Place, Open Hackathon
Python · Raspberry Pi · Kali Linux

2024

- Built a portable forensic recovery toolkit achieving 90% data recovery accuracy; implemented evidence chain-of-custody logging and metadata extraction aligned with investigation standards.
- Won 1st place in a competitive open hackathon, demonstrating ability to deliver technically rigorous solutions under pressure.

EDUCATION

B.Tech in Cybersecurity CGPA: 8.8 / 10
GITAM Deemed University, Bengaluru

2022 – July 2026 (Expected)

ADDITIONAL INFORMATION

Languages	English (Professional), Kannada (Native)
Soft Skills	Analytical thinking, structured documentation, attention to detail, self-driven learner
Tools	Microsoft Office (Word, Excel, PowerPoint), Git, VS Code
